

Visions and values

Profilglass bases its values on environmental and social sustainability, promoting "development that meets the needs of the present without compromising the ability of future generations to meet their own needs" (Brundtland Report, 1987).

Starting from the features of the raw material used, 100% recyclable and versatile, ideal for numerous applications and for improving the quality of life and of the environment, Profilglass applies policies aimed at recovery and recycling and to minimize environmental impact, with a perspective of continuous improvement.

The key to Profilglass' success are the people, the teamwork and the spirit of cooperation. For this reason, Profilglass values ideas, exploiting the synergies and know-how of its business, achieving excellent results and strengthening the company's value. Profilglass pays great attention to the internal and external context in which it operates, to the requirements and points of view of the interested parties, to the protection of the environment, including the prevention of pollution, safety in the workplace, health and professional growth ... essential pillars of corporate development and at the basis of the relationship with suppliers and customers.

Commitments

Profilglass S.p.A. has set up a management system for the environment and for Health and Safety, a tool that ensures compliance in time of all legal requirements applicable to any process on which Profilglass S.p.A. can exercise control or influence, considering also a product life cycle perspective. The management system supports all activities of continuous improvement of environmental and safety performance in a "risk-based thinking" perspective, favouring the prevention of risk and connected environmental impacts, particularly through the commitment, participation and awareness of its employees and external workers who work there at all levels, actively consulting their representatives.

Main targets for environment and safety

It is Profilglass S.p.A.'s intention to work on the following targets for safety:

- ✓ reduction of the number and severity of accidents on the workfloor,
- ✓ reduction of higher classified risks to Health and Safety, and operate to control those risks classified as "acceptable".
- ✓ Improve the health and safety system performance, taking technical evolution into account.

Profilglass S.p.A. intends to operate on the following environmental targets :

- ✓ reduction of energy consumption, and natural resources used,
- ✓ reduction of the total amount of waste, especially when these are considered dangerous,
- ✓ reduction of environmental impacts considered as most significant, and operate to control those impacts classified as "significant".
